

RAMCO
GROUP

STRENGTH IN Diversity — Kenya • Uganda • Tanzania • Rwanda —

OUR JOURNEY

Rambhai Patel came to Kenya in mid 1940s from the Gujarat region of India. In 1948, he founded Rambhai & Co. Ltd, a small hardware store in downtown Nairobi, and that was the humble beginning of what is now the Ramco Group. His three sons joined the family business after their studies, and based on these strong family ties, the group built a solid foundation on which it could grow and expand. Ramco Group's initial expansion was within the hardware and building supplies industry which the family knew well. The third generation joined the business in the early 1990s and over the years they have used the strength of technology, innovations and strategic partnerships to position the group as a leader in diverse sectors of the economy.

The Group has now grown into a privately owned group of over 40 companies across the East Africa region. With an annual turnover exceeding USD 320 million, the group employs over 4,000 people across six different sectors of print, hardware and trading, manufacturing and supplies, office supplies, services, and property. Each company within the group is recognized as a key player within its sector and is driven by a passion for excellence in quality and customer service.

“

We attribute our success to our strong heritage, our people's commitment and our work culture.

OUR PRINCIPLES

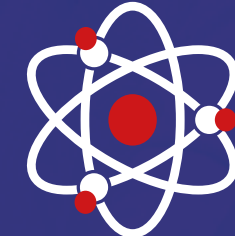

Our Philosophy

We encourage, We support,
We grow by powering each others' strength.

Our Mission

Be brave, be confident
& believe

Our Core Values

- Courage
- Honesty & Integrity
- Innovation
- Commitment

Built on Strong Foundations

We respect diverse values and have achieved tremendous growth as we aim to build a socially trusted group of companies. The synergy developed between our companies offers better economies of scale with our clients reaping the benefits.

Delivering Personalised Service

We build client relationships based on value added services that satisfy our customers and strongly believe in going the extra mile to exceed their expectations.

Sustainability for the Future

Sustainability is a key driver for our business and finds its expression in a wide range of environmental causes, practices and endeavours that we support. Energy efficiency and cleaner production methods are a constant focus in all of our manufacturing units.

Creating Shared Value

We believe that the community we operate in has played a significant role in our growth. We therefore undertake various projects in education, development and social well-being as a way of giving back to the society.

Education

We believe that education is the strongest backbone of growth. To transform lives and inspire generations to be brave, confident and believe, we have since;

- Rolled out a school bursary program for underprivileged children.
- Provided access to our companies for student industrial tours giving them first-hand experience of work cultures.
- Empowered schools by issuing co-curricular sponsorships.

Culture

Over the years, we have learnt and practised the art of recognizing outstanding ideas, traditions and social behaviours. To this end, we continuously offer our support to different customs through;

- Visits, donations and mentorship to under-privileged and vulnerable children in children homes.
- Blood donation drives where over 1,000 pints of blood have been collected.
- Supply of water tanks to over 125 under-privileged schools.

Environment

We have made it part of our DNA to act in environmentally responsible ways. In full knowledge of the effects of climate change and solutions to address the same, we have so far;

- Planted over 2,000 trees in partnership with the Kenya Forest Services.
- Rolled out beautification drives on major roads within Nairobi City.
- Organized clean-up exercises of major roads and drainage systems in collaboration with the Nairobi Metropolitan Services.

OUR BUSINESS
